

GREENHOUSE CROPS - INTERMITTENT FEEDING

Limitations, Restrictions, and Exceptions

DIRECTIONS FOR USE: PLANTEX 21-7-7 is recommended for use on all plants depending on the water quality. This fertilizer is highly acidic. For tender plants, spray applications and outdoor application in hot weather, use one half the recommended rate of application. Rinse foliage with clear water after application. PLANTEX is soluble at the rate of 2½ - 4 lbs per gallon of water. Use warm water for fastest dissolving. PLANTEX 21-7-7 is formulated for use on acid-loving plants or planted material that has a media pH which is too high. Check media pH after 2-3 applications.

Refer in the label for the specific rate Table.
