

# TURF

## General Information

### NOTE:

Plants absorb only minor amounts of nutrients applied to foliage. Foliar treatments supply only a portion of the three major nutrients (nitrogen, phosphorus and potassium) required for successful crop production. Applied to the foliage, this product is recommended only for use as a supplementary source of plant nutrients to a basic fertilizer program that relates to the fertility level of the soil.

## Limitations, Restrictions, and Exceptions

### DIRECTIONS FOR USE:

Plantex 35-5-10 Soluble Turf Fertilizer is recommended for use on all types of turf. For newly germinated turf or applications in very hot weather, use one half the recommended rate. Use warm water for fastest dissolving. Store in a cool, dry place.

Apply Plantex 35-5-10 in sufficient water for uniform coverage. A minimum of 20L of water per 1000 ft<sup>2</sup> (100 m<sup>2</sup>) is required for proper application.

Apply 3 to 4 times during the season.

### Rate:

Nitrogen: 0.75 lb N / 1000 sq ft and 350 g N / 100 sq meter
