

GROW IN

General Information

General Information:

Jump Start 8-30-4 is a high phosphate liquid plant food fortified with blackstrap molasses to enhance microbial activity and root mass and with humic acid to increase nutrient availability. Jump start promotes early and rapid root development on turf, ornamentals, and vegetable crops. Jump Start is incompatible with products containing high levels of calcium

Limitations, Restrictions, and Exceptions

DIRECTIONS FOR USE:

Jump Start contains 3.4 lbs of phosphate per gallon of product. Dilute with water and apply the desired phosphate rate.

Grow In: Apply 10 gallons per acre at time of sprigging and every 14 days thereafter until turf is established.
