

FOR USE ON ALL PLANTS

Limitations, Restrictions, and Exceptions

DIRECTIONS FOR USE:

PLANTEX SOLUTIONS Complete 17-5-17 is recommended for use on all plants depending on the water quality. For tender plants and greenhouse spray applications use one half the dosage. PLANTEX SOLUTIONS fertilizer is soluble at the rate of 2½ - 4 lbs. per gallon of water. Use warm water for best results.

- When using a 1:100 ratio injector, use the chart in the label to determine the volume of water to use, per bag, to achieve the desired ppm of Nitrogen. There are 2 compartments within each 25 lb bag. The entire contents of both of the compartments must be put into the indicated amount of water.
