

## **COOL & WARM SEASON TURF - TEES AND GREENS**

### General Information

General Information: SeaCal is a supplemental liquid fertilizer designed for turf and ornamentals containing nitrogen and an advanced form of foliar calcium derived from calcium acetate and calcium nitrate. Liquid kelp extracts and specialized yeast extracts are added as natural sources of nutrients and to alleviate plant stress.

### Limitations, Restrictions, and Exceptions

Cool & Warm Season Turf: Tees and greens, apply every 7-21 days as needed.
