

FOLIAR APPLICATION: VEGETABLE CROPS

General Information

PRODUCT INFORMATION

BIOMIN BOOSTER 235 contains amino acid chelated minerals for soil and foliar application. It is completely bioavailable and non-phytoxic to plants when applied in accordance to directions. It is designed to prevent and correct mineral deficiency and to boost crops during critical stages or fast growing periods. It can be applied in combination with nitrogen fertilizer.

For best results, apply BIOMIN BOOSTER 235 when the crop is in active growing stage, after irrigation or natural rain fall. For foliar application, it should be diluted with at least 100 times of water. BOMIN BOOSTER 235 will lower high pH of water and decrease the hydrolisis of most pesticides.

Bomin Booster 235 Can Be Applied To Strawberry, Lettuce, Tomato, Celery, Stone Fruits, Vegetables, Grapes, Commercial, Turf, And Ornamental Gardens.

Limitations, Restrictions, and Exceptions

Repeat the application 1-3 weeks later.
