

FRUITS AND TREES

General Information

GENERAL INFORMATION

BUFFER-SAFE is formulated as a nutritional spray. As a foliar nutrient spray, BUFFER-SAFE is designed to be compatible in tank mixes with other agricultural products.

DIRECTIONS FOR USE:

Nutritional Spray: BUFFER-SAFE may be applied by air, concentrate or ground rig. Do not apply at concentrations greater than 1 quart in 10 gallons (2.5 in 100 liters) of water by air or one quart in 25 gallons (2.5 in 250 liters) of water in ground sprays.

Limitations, Restrictions, and Exceptions

FRUITS AND TREES: Apply 1-2 quarts (2.5-5.0) per acre with sufficient water to cover the whole area. For aerial application use 1 quart per acre in 10-20 gallons (2.5 in 100-200 liters) of water. Make 2-3 applications per year with first application prior to bloom.
