

# **PRE-PLANT WITH LIQUID FERTILIZER AND OR HERBICIDE**

## General Information

### PRODUCT INFORMATION

FULZYME is a fertilizer that contains extract from the fermentation of protein and amino acids using Bacillus spp. When applied to the soil, it may activate soil biological activities. Fulzyme is designed to increase plant growth and yields while reducing stress brought on by unfavorable conditions.

Fulzyme Can Be Applied To Strawberry, Lettuce, Tomato, Celery, Grapes, Stone Fruits, Tree Fruits, Vegetables, Commercial Turf And Oranmental Gardens.

### Limitations, Restrictions, and Exceptions

Pre-Plant with liquid fertilizer and or herbicide:

Check compatibility with fertilizer and/or herbicide. Add 2-4 quarts of FULZYME per acre (5-10 Liters/Ha) to solution and apply as usual. Apply within 24 hours of mixing.
