

# SOIL APPLICATION

## General Information

### GENERAL INFORMATION

Superzyme contains organic plant food. It also contains extract from the fermentation of protein and amino acids using *Bacillus* spp., *Pseudomonas putida* and *Trichoderma* spp. Superzyme is designed for soil and foliar application.

### Limitations, Restrictions, and Exceptions

Soil: Apply SUPERZYME-Turf to soil at 1-2 gallons per acre (5-10 liters/hectare), and water immediately.
