General Information

COMPATIBILITY

Always check for compatibility with other products prior to use.

GENERAL INFORMATION

Carbond High Yield - Is designed as a foliar fertilizer, complexed with humic acid.

Carbond High Yield - is developed as an easy to use formulation that is highly compatible with most fertilizers and foliar sprays.

Methods of application: Carbond High Yield can be applied as a foliar spray or chemigated with a maximum of 0.2 inches of water.

Aerial Application: Use a minimum of 10 gallons of water per acre. If less water is used foliage injury may occur. Aerial application should not exceed 5 ounces per gallons of water. Avoid spraying during high temperatures or when humidity is very low. For safest and best results, plants should be actively growing and free of stress.

Limitations, Restrictions, and Exceptions

Agricultural applications: 2 to 8 qts per acre apply as needed during the growing season, or as directed. It should be applied in a minimum of 5 to 50 gallons of water.
