ORNAMENTAL PLANTS: FUNGUS GNAT LARVAE (BULK DENSITY: 400 LBS/CUBIC YARD)

General Information

ENVIRONMENTAL HAZARDS

This pesticide is extremely toxic to fish and aquatic invertebrates. Do not apply directly to water or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not apply when weather conditions favor drift from treated areas. Drift and run-off from treated areas may be hazardous to aquatic organisms in neighboring areas. Do not contaminate water when disposing of equipment washwaters or rinsate.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Not for use on plants being grown for sale or other commercial use, or for commercial seed production, or for research purposes. For use on plants intended for aesthetic purposes or climate modification and being grown in interior plantscapes, ornamental gardens or parks, or lawns or grounds. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

Limitations, Restrictions, and Exceptions

For General Use on Ornamental Plants outside the scope of USDA guidelines - Use the higher rates for extended residual control.

Comments: Using the chart as a guide, incorporate the appropriate amount of Bifenthrin Nursery Granular Insecticide into one cubic yard of potting media based on the known bulk density.

Method

Soil incorporation
Rates

- field_rates 0
- field_rates 1

Restricted Entry Interval

12 hours

Exception: if the product is soil-injected or soil incorporated, the Worker Protection Standard, under certain circumstances, allows workers to enter the treated area if there will be no contact with anything that has been treated.
