

APPLICATION TO ORNAMENTALS

General Information

ENVIRONMENTAL HAZARDS

Do not apply directly to water, areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters.

This product is highly toxic to bees exposed to direct treatment or residues on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds if bees are visiting the treatment area. This product is toxic to wildlife and highly toxic to aquatic invertebrates.

This chemical demonstrates the properties and characteristics associated with chemicals detected in ground water. The use of this chemical in areas where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination.

Limitations, Restrictions, and Exceptions

APPLICATION TO ORNAMENTALS:

Apply GRUBS AWAY as a broadcast application on ornamentals in commercial and residential landscape. GRUBS AWAY is a systemic product and will be translocated upward within the plant system. Optimum control will be achieved when applications are followed by sufficient mechanical incorporation, irrigation or rainfall to move the active ingredient into the soil. Make applications prior to anticipated pest infestations to achieve optimum levels of control.

Note: GRUBS AWAY can be used on plants intended for aesthetic purposes or climatic modification and being grown in interior plantscapes, ornamental gardens or parks, or on golf courses or lawns and grounds.

- Apply as a broadcast treatment. Prior to application, remove black plastic or other weed barrier material that will not permit water permeability.

- NOTE: For optimum control, follow with irrigation or rainfall within 24 hours after

application to move the active ingredient into the soil.

- Refer to label for Spreader Settings.

RESTRICTIONS:

Do not use on commercial greenhouses, nurseries, on sod farms or on grass grown for seed.

APPLICATION EQUIPMENT:

Apply GRUBS AWAY uniform over the area being treated with normally used granular application equipment. Both drop-type and rotary-type spreaders may be used to apply GRUBS AWAY. Do not use of spreaders which would apply the material in concentrated bands. Calibrate application equipment prior to use according to the manufacturer's directions. Check frequently to be sure equipment is working properly and distributing granules uniformly and accurately.
