

LANDSCAPE INSTALLATION AND MAINTENANCE - BEDS

General Information

GENERAL INFORMATION

SA-50 Brand Soil Wetting Agent is recommended for use in the installation and maintenance of turf, ornamentals, trees, hanging baskets, bedding plants, planters and beds. It ensures uniform distribution and availability of moisture in the rootzone. Used as directed a treatment lasts three to four months and is biodegradable and non-toxic to plants and animals.

Limitations, Restrictions, and Exceptions

Directions

Water in thoroughly immediately after application.

BENEFITS FOR ORNAMENTALS and LANDSCAPES

- Increases the speed of initial wetting and rewetting of soil and soilless mixes.
- Reduces hand watering and irrigation frequency saving water and labor.
- Improves the uniform movement of water into and through flats, containers and rootballs.
- Decreases shrinkage, run-off and channeling, so more water gets to the rootzone.
- Improves leaching of harmful salts from plant containers.
