

# **INSECTICIDES, FUNGICIDES, MITICIDES**

## General Information

### GENERAL INFORMATION

For use with agricultural, industrial, and aquatic herbicide products. DW-SURFACTANT 90 is a highly concentrated low-foam, non-ionic spreader activator. DW-SURFACTANT 90 increases the activity and effectiveness of agricultural insecticides, fungicides and herbicides by breaking down the waxy cuticle on the leaf surface and improves adhesion between the pesticide and the plant surface.

### Limitations, Restrictions, and Exceptions

For use with acaracides, insecticides, fungicides, miticides, (Livestock sprays): Use 1/4 to 1/2 pint (4 to 8 fl. oz.) per 100 gallons of water.

NOTE: The application rates on the label are based on pesticide labels which recommend the use of a nonionic surfactant. Rates of this product may be increased or decreased. For optimum results, follow pesticide labeling for proper recommendations. Before using DW-SURFACTANT 90 where a nonionic surfactant may not be recommended the user or applicator advisor must have experience with the combination or must have conducted a phytotoxicity trial.
