

OUTDOOR APPLICATIONS

General Information

PRODUCT INFORMATION

Use Instructions and Precautions:

Do not treat areas that are easily accessible to children and pets.

- Advion Cockroach Gel Bait can be used indoors or outdoors applied as a crack and crevice treatment within residential homes, industrial facilities, offices, warehouses, commercial kitchens, hospitals, schools, nursing homes, hotels, buses, trains, aircraft, retail and commercial establishments, and other areas infested with cockroaches.

- Apply Advion Cockroach Gel Bait to areas frequented by cockroaches such as between different elements of construction, between equipment and floors, openings leading into voids and hollow spaces in floors, walls, ceilings, equipment legs and bases, around plumbing pipes, doors and windows, and behind and under appliances, cabinets, sinks, closets, and any other equipment that cockroaches are typically known to hide.

- Do not apply Advion Cockroach Gel Bait to surfaces recently treated with residual sprays.

- Do not apply residual sprays to surfaces treated with Advion Cockroach Gel Bait.

- Inspect bait placements during follow-up inspections and apply fresh bait as needed.

- Do not apply to surfaces that food contacts.

- Do not allow open foods to contact gel material.

Limitations, Restrictions, and Exceptions

Outdoor Use Directions:

A thorough inspection around a structure may reveal areas where cockroaches are

gaining access. Attempts should be made to remove the access. Advion Cockroach Gel Bait may also be applied as a spot or thin bead (see above) to pest entry sites such as along windows, doors, between construction elements, sewer areas, adjacent trees which harbor cockroaches, along walls, garbage holding areas, or suitable placement site acting as a cockroach harborage. Place baits in such a way as to reduce the potential of subsequent human contact. Inspect Advion Cockroach Gel Bait placements periodically and apply fresh bait as needed.
