

## SOIL

### General Information

#### GENERAL RECOMMENDATIONS

EQUATION contains many nutrients that are necessary for plant growth and development. EQUATION may be used as a soil or foliar application to any food or fiber crop where the addition of one or more of the nutrients contained in EQUATION would be beneficial.

When used along with sound agronomic practices, EQUATION will enhance plant growth and increase early season root development to maximize yield potential.

EQUATION can enhance the yield potential of many crops including alfalfa, corn, dry edible beans, potatoes, sugarbeets, sunflowers, and wheat.

#### Limitations, Restrictions, and Exceptions

#### SOIL

Apply 1 to 5 gallons per acre as a starter fertilizer or as a soil applied broadcast application in a balanced fertility program. Water may be added to increase application rate.
