

## **POSTEMERGENCE**

### General Information

#### GENERAL RECOMMENDATIONS

EQUATION contains many nutrients that are necessary for plant growth and development. EQUATION may be used as a soil or foliar application to any food or fiber crop where the addition of one or more of the nutrients contained in EQUATION would be beneficial.

When used along with sound agronomic practices, EQUATION will enhance plant growth and increase early season root development to maximize yield potential.

EQUATION can enhance the yield potential of many crops including alfalfa, corn, dry edible beans, potatoes, sugarbeets, sunflowers, and wheat.

#### Limitations, Restrictions, and Exceptions

#### POSTEMERGENCE

Apply 1 to 3 gallons per acre to an actively growing crop to supplement an existing fertilizer program or to correct an existing nutrient deficiency. Postemergence applications should be made in a minimum of 10 gallons per acre of water.
