

WETTABLE POWDERS

General Information

GENERAL INFORMATION

PREFER 9° is an excellent quality, nonionic surfactant. PREFER 9° can be used with most insecticides, fungicides, herbicides, acaricides, defoliants, desiccants and wettable powders to improve performance of the active spray ingredient by giving them more uniform distribution and better wetting of the plant surface. PREFER 9° meets the requirements of most pesticide manufacturer's for a 90/10 surfactant.

Limitations, Restrictions, and Exceptions

WETTABLE POWDERS

Variations in conditions of use can cause some variation in the amount of this product required. The minimum required to give a smooth, uniform coverage usually gives the most effective results. Not for aquatic use.
