

AIR AND GROUND - FOR IMPROVED EFFICACY

General Information

DIRECTIONS FOR USE

WESTLINK AG INTENSIFY is an activator / penetrant formulated with ammonium salts, non-ionic surfactants and anti-foaming agents. This product enhances the biological activity and leaf surface penetration of herbicides, defoliants and desiccants whose labels specify the addition of ammonium sulfate/ nitrate and/or surfactants. These may include glyphosate-containing products, paraquat-containing products, sulfonyl urea herbicides, and others. WESTLINK AG INTENSIFY may be used on agricultural, aquatic, forestry, turf and ornamental, industrial, and noncropland sites.

RECOMMENDATIONS:

Specific use rates will vary with conditions of application such as water hardness, application method, equipment, spray droplet size, condition of foliage, etc. Also, higher rates than those below may be used if recommended by pesticide labeling. Follow pesticide label directions. However, do not add this product at a rate which exceeds 5% of the finished spray volume. One gallon of WESTLINK AG INTENSIFY contains 2 lbs. of ammonium sulfate.

Limitations, Restrictions, and Exceptions

For improved efficacy, use at least 1 pint per acre when finished spray volume is less than 20 gallons per acre.
