

# ANTI-CRUSTANT

## General Information

### GENERAL INFORMATION

Zeba is a biodegradable, non-toxic, starch-based superabsorbent polymer. It is designed to rapidly absorb and maintain moisture in the root zone, releasing moisture to plants as needed.

## Limitations, Restrictions, and Exceptions

### Anti-Crustant

As an anti-crustant, to aid in germination and stand establishment, band directly over the seed row before the press wheel. Apply at 2-4 lbs of Zeba per acre [2.5-5 Kg of Zeba per hectare].
