

AGRICULTURAL CROP

General Information

GENERAL INFORMATION

Zeba is a biodegradable, non-toxic, starch-based superabsorbent polymer. It is designed to rapidly absorb and maintain moisture in the root zone, releasing moisture to plants as needed.

Limitations, Restrictions, and Exceptions

Agricultural Crops

Apply Zeba 4-6 inches [10-15 cm] below the soil surface in proximity to root zone at a rate of 3-10 lbs. per acre [3.5-11 Kg per hectare]. Use higher rates of 7-10 lbs. per acre [7.5-11 Kg per hectare] in soil with low moisture holding capacity for optimal moisture retention.
