

NEWLY PLANTED TREES AND VINES

General Information

GENERAL INFORMATION

Zeba is a biodegradable, non-toxic, starch-based superabsorbent polymer. It is designed to rapidly absorb and maintain moisture in the root zone, releasing moisture to plants as needed.

Limitations, Restrictions, and Exceptions

Newly Planted Trees and Vines

For new plantings, use 1 Tbsp.- 2 Tbsp. per tree. Place half the Zeba in the planting hole and mix the remaining half in the backfill soil.
