

SOIL POTTING

General Information

GENERAL INFORMATION

Zeba is a biodegradable, non-toxic, starch-based superabsorbent polymer. It is designed to rapidly absorb and maintain moisture in the root zone, releasing moisture to plants as needed.

Limitations, Restrictions, and Exceptions

Soil Mix

Use 2.5-5 Tbs. per cubic foot [2.5-5 Tbs. per 28.3 Liters] of potting soil, or 4-8 cups (1-2 lbs.) per cubic yard [5.4-10.8 cups (600 g-1.2 Kg) per cubic meter]. Incorporate Zeba thoroughly into dry soil mix.
