

LANDSCAPES

General Information

GENERAL INFORMATION

Zeba is a biodegradable, non-toxic, starch-based superabsorbent polymer. It is designed to rapidly absorb and maintain moisture in the root zone, releasing moisture to plants as needed.

Limitations, Restrictions, and Exceptions

Landscapes

Spread Zeba on beds at rate of 4-8 cups (1-2 lbs.) per 1,000 square feet [4.5-9 cups (0.5 Kg) per 100 square meters] and rake or work into the top 3-6 inches [8-15 cm] of soil before planting.
