

SMALL SEEDED PLANTS

General Information

GENERAL INFORMATION

Zeba is a biodegradable, non-toxic, starch-based superabsorbent polymer. It is designed to rapidly absorb and maintain moisture in the root zone, releasing moisture to plants as needed.

Limitations, Restrictions, and Exceptions

Small Seeded Plants

Apply Zeba in drill row at planting at rate of 1-4 lbs. per acre [1.2-5kg per hectare] for alfalfa, grass seed and other small seeded crops and plants.
