

POTTING SOIL

General Information

GENERAL INFORMATION

Zeba is a biodegradable, non-toxic, starch-based superabsorbent polymer. It is designed to rapidly absorb and maintain moisture in the root zone, releasing moisture to plants as needed.

Limitations, Restrictions, and Exceptions

Soil Mix

Use 2-4 Tbs. per cubic foot [2-4 Tbs. per 28.3 Liters] of potting soil, or 3.75-7 cups (1-2 lbs.) per cubic yard [4.5-9 cups (600g-1.2 Kg) per cubic meter]. Mix Zeba thoroughly into soil.
