

CITRUS SPRAYS

General Information

GENERAL INFORMATION

VEGETABLE OIL CONCENTRATE is specially formulated to maximize the performance of pesticides by increasing the deposition and coverage of chemicals on the target crop. This product is designed to create uniform droplet size, reduce evaporation and drift, increase coverage and reduce washoff.

VEGETABLE OIL CONCENTRATE is especially suited to aerial application and applications using low volumes of water. It is compatible with many commonly applied chemicals.

DIRECTIONS FOR USE

NOT FOR AQUATIC USE

In all applications of VEGETABLE OIL CONCENTRATE read and follow the directions for use on the pesticides as to procedures, dosage rates, timing of application and restrictions for the crop on which the pesticide is to be applied. The use of test areas is recommended when applying during period of high humidity or high temperature or to new varieties where field experience is limited.

Limitations, Restrictions, and Exceptions

CITRUS SPRAYS: (100- 500 gallons per acre). Use 1% of the total amount of water.
