

BEANS, BEETS, BROCCOLI, ETC.

General Information

GENERAL INFORMATION

FORMULA 1 P-60 is designed as a soil nutritional product which is intended to be used as a supplement to a regular fertilizer program. The phosphorus source in FORMULA 1 P-60 is 100% phosphorous acid for quick absorption and translocation.

CAUTION

Because of the acid pH of this product, caution should be used when applying this product. Because of varying conditions over which the manufacturer has no control, including weather, the use of other pesticides and fertilizers and variability within species, it is recommended that the user conduct limited field tests before broad scale use.

APPLICATION INFORMATION

FORMULA 1 P-60 is designed for soil applications and can be applied through various types of soil irrigation systems or as a side dressing . This product should be used with caution when placed close to the root zone or to seeds as injury to crop may result.

Phosphorous acid products are intended to be used as a supplemental fertilizer treatment.

As a soil application to annual crops, a lesser response from the initial crop, with a corresponding superior response from succeeding crops, may be observed. In addition, placement close to seeds or root zones may be injurious to crops. The effect may be aggravated by a soil pH below 6.5.

Limitations, Restrictions, and Exceptions

Beans, Beets, Broccoli, Carrots, Cauliflower, Cucumbers, other Cucurbits, Garlic, Lettuce, Leafy Vegetables, Melons, Onions, Peas, Peppers, Row Crops, Spinach, Strawberries, Tomatoes.. Apply FORMULA 1 P-60 at a rate per application. Apply the first application after transplanting or thinning. Apply one to two subsequent

applications at ten to fifteen day intervals as needed to meet nutritional needs.
