

## **SOIL APPLICATION**

### General Information

General information: when SBC Sobec Clutch is applied at recommended rates to the soil, SBC SOBEC Clutch may provide a food source to microbiology and may increase bio-diversity in the soil.

Directions for use: SBC Sobec Clutch is most effectively applied through irrigation water. SBC Sobec Clutch can be effectively applied through any irrigation system, including drip, micro-sprinkler, sprinkler, center pivot, furrow and flood. SBC SOBEC Clutch can also be sprayed directly on the soil surface preceding irrigation.

**MIX OR AGITATE BEFORE APPLYING PRODUCT.**

Rates and application timing varies for specific crops and soil conditions. Contact Sobec, Inc. for specific recommendations.

### Limitations, Restrictions, and Exceptions

#### General Soil Rates:

Apply 10 to 60 gallons of SBC SOBEC Clutch per acre. Rates and application timing varies for specific crops and soil conditions. Contact the SOBEC, Inc. for specific recommendations.
