

# **SOIL**

## General Information

### GENERAL INFORMATION

RxBIO is a dry formulation developed as an easy to use formulation that is compatible with most fertilizers.

### APPLICATION GUIDELINES

-Proper application rates and frequency should be determined by specific conditions and plant requirements.

-Always jar test before adding to a spray tank or injection tank.

-Spray applications should be made with sufficient water, 50 mesh screens, and agitation throughout the application.

-When RxBio is combined with Redox micronutrients, do not exceed 0.5% concentration by weight of the micronutrient products if the spray material might come in contact with exposed fruit or vegetables.

-When tank mixing with other chemicals, it is the responsibility of the end-user to assume compatibility and safety.

-Poly in-line filters should be replaced with stainless steel, if possible.

-Always consult your agronomist.

### Limitations, Restrictions, and Exceptions

### COMMENTS

Inject through controlled irrigation system or spray on soil surface and water into root zone.

Multiple applications are optimum.

NOTE: Do not mix RxBio with low pH products, calcium nitrate or other high calcium formulations.
