

SODIC SALINE SOIL (HEAVY)

General Information

GENERAL INFORMATION

Soilex is recommended for direct injection in the root zone, early in the plant life cycle or applied as a pre-plant. Follow up applications may be necessary.

Rates are given considering a complete growth cycle. For best results, split applications are suggested 3-5 times during the crop.

APPLICATION GUIDELINES

- Proper application rates and frequency should be determined by specific conditions and plant requirements.
- Soilex is highly compatible with most plant nutrients when applied under constant agitation.
- Agitate container prior to usage.
- Always jar test before adding to a spray tank or injection tank.
- Spray and fertigation applications should be made with sufficient water, 50 mesh screens, and agitation throughout the application.
- when tank mixing with other chemicals, it is the responsibility of the end-user to assume compatibility and safety.
- Poly in-line filters should be replaced with stainless steel, if possible.
- Always consult your agronomist.

Limitations, Restrictions, and Exceptions

COMPATIBILITY

Always check for compatibility with other products prior to use.

Do not mix with Sulfur or conventional Sulfur based fertilizer.
