

SWEET POTATOES (POST-HARVEST STORAGE)

General Information

USE PRECAUTIONS

Read all precautions and directions before using. Apply this product only as specified on the label.

Imidan 5 Dust is compatible with most commonly used insecticides and fungicides, but is incompatible with alkaline materials such as spray lime, lime sulfur, and bordeaux mixtures.

These materials will reduce the insecticidal activity of Imidan 5 Dust.

APPLICATION RESTRICTIONS

Do not enter or allow entry until dusts have settled.

Limitations, Restrictions, and Exceptions

SWEET POTATOES (POST-HARVEST STORAGE)

Sweet Potatoes (Post-harvest storage): For control of sweet potato weevil, apply 2 to 4 ounces of Imidan 5 Dust per 50 pound bushel of stored sweet potatoes. Using suitable dusting equipment, thoroughly cover all surfaces of the potatoes. Applications should be made as soon as possible before storage. Make only one application. Wash sweet potatoes in clean water before marketing.
