

LARGE ANNUAL WEEDS

General Information

General information: GREENMATCH O is a broad spectrum weed killer that contains a citrus extract. It is non-selective and controls most annual weeds, both grasses and broadleaves. For best performance, complete coverage of target weeds is necessary. Spray until thoroughly wet. It is recommended for non-food areas such as borders, driveways, sidewalks, around mature trees and ornamentals, around buildings, in greenhouses and around flower beds.

Environmental Conditions: GREENMATCH O is effective over a wide range of environmental conditions. Cool weather will slow the activity of GREENMATCH O but should not affect its performance.

Allow heavy dew to evaporate prior to GREENMATCH O applications. Do not apply if windy conditions exist or a strong threat of rain is expected within 2 hours.

Limitations, Restrictions, and Exceptions

Larger annual weeds: for annual weeds above 6 inches tall, use a 1:4½ ratio of GREENMATCH O to water; dilute 1 part of GREENMATCH O in 4½ parts of water.
