

ORNAMENTALS

General Information

TERRAZOLE L is useful as a soil fungicide for control of damping-off, root and stem diseases caused by Pythium and Phytophthora.

Use only at recommended rates as overdosage may be harmful to sensitive plants.

Limitations, Restrictions, and Exceptions

ORNAMENTALS

TERRAZOLE L is mixed with water and applied as a soil drench, beginning at the time of seeding or transplanting. For use in commercial nurseries and greenhouses only. Use in residential greenhouses or other indoor plant sites is prohibited.

APPLICATION NOTES

Apply the specified rate of TERRAZOLE L according to the guidelines (See the label for the guidelines on application \"For Bed and Bench Grown Plants\" and \"For Container Grown Plants\"). Continually agitate the drench solution to assure uniform application of the fungicide material. To improve penetration of the fungicide, the drenching must be followed with an additional quantity of water equal to at least half the volume of the fungicidal drench, applied either by sprinkling or irrigation.

REMARKS

Retreat at 4 to 12 week intervals as necessary.

Use higher rates for peat and other organic potting media.

PLANT TOLERANCE:

Neither the manufacturer nor the seller has determined whether or not TERRAZOLE L can be used safely on all ornamental plants. Prior to any large scale application on such plants, the user should determine the safety of TERRAZOLE L fungicide by testing a small number of the type of plants to be treated at the recommended rates for that particular group, i.e., bedding plants, foliage, etc.
