

# GRAPES - POWDERY MILDEW, BUNCH ROTS

## General Information

### GENERAL INFORMATION

Apply recommended amounts when air is calm, using ground equipment, aircraft, or hand duster. Applications of material containing sulfur should not be made just prior to or during periods of high summer temperatures. Concord and other Labrusca type grapes may be injured by sulfur. Consult your local Agricultural Extension Service for additional information consistent with directions on the label. Do not mix or dilute with other products. Thorough coverage is essential.

## Limitations, Restrictions, and Exceptions

### GRAPES

Repeat application at 3 to 10 day intervals. The maximum annual application of metallic copper is 20 lbs per acre per year.
