

COLE CROPS - FOLIAR APPLICATIONS

General Information

General Information

Core Zinc Nitrate is a readily available form of zinc, specifically formulated for use to treat zinc deficiencies and disorders in vegetable crops, field crops, trees, vines, turf and ornamentals. CORE Zinc Nitrate used as a foliar spray along with a sound fertility program, assures that the nutritional demands of the plant are satisfied. Avoid application under extreme climatic conditions.

CORE Zinc Nitrate can be used on any agricultural crop where a zinc deficiency exists or where added zinc would be beneficial. Compatibility: CORE Zinc Nitrate is formulated to mix with most commonly used insecticides and fungicides. This product can also be applied via irrigation. However, a jar test for compatibility should be performed prior to application. This product is not recommended for use with copper or tin fungicides.

Limitations, Restrictions, and Exceptions

Cole Crops (Broccoli, Brussels Sprouts, Cabbage, Calabrese, Cauliflower): Repeat application as required using 1 pint/acre.
