

GREENS AND TEES - BERMUDAGRASS

General Information

PRODUCT DESCRIPTION

GreenSun Turf 90 Mini Granule is a degradable sulfur product in a granular form that can be used both as a source of plant nutrient sulfur and/or as a soil amendment for correction of problem alkali soils. "Tri-Green Technology" is a proprietary formulation which includes a wetting agent, a suspending agent and a swelling agent. GreenSun Turf 90 Mini Granule in addition to having Tri-Green Technology is produced using CoreAgri's unique pastille manufacturing process. GreenSun Turf 90 Mini Granule is formulated for uniform distribution in lawn and turfgrass applications.

GENERAL APPLICATION AND USE RECOMMENDATIONS

Do not apply near water, storm drains or drainage ditches. Do not apply if heavy rain is expected. Apply this product only to your lawn, and sweep any product that lands on the driveway, sidewalk, or street back onto your lawn.

Apply GreenSun Turf 90 Mini Granule to dry turf, watering after each application will aid in dispersion of the granules. Apply once per year prior to the growing season or at the end of the growing season when used as a plant nutrient. To minimize product pick-up, do not collect clippings if possible when first mowing after application. Established turf/lawns apply 3.5 lbs per 1,000 sq ft and avoid overlapping. Over application or misuse may cause damage to turf/lawn.

Limitations, Restrictions, and Exceptions

Greens and Tees: Apply GreenSun Turf 90 Mini Granule in the spring or early fall until the desired soil pH is obtained. See table for recommendations. Two applications per year may be used in areas with longer growing seasons or on greens with a high buffering capacity (CEC>15). Do not exceed 4 lbs per 1,000 sq ft per application on Bermuda.
