

DILUTE - AERIAL APPLICATION

General Information

GENERAL INFORMATION

MULTI-SPRED is a 98% active premium blend of organosilicones, methylated vegetable oil and non-ionic surfactants. It provides superior spreading, penetration and activation of herbicides, fungicides, insecticides and defoliant. Because MULTI-SPRED contains organosilicones, it offers faster, more uniform distribution of active material on the leaf surface than conventional spreaders. The vegetable oil ensures complete penetration through the waxy leaf cuticle.

DIRECTIONS FOR USE:

Preparation of Spray Material.

1. Fill spray or mix tank with 1/2 to 3/4 the desired amount of water. Start mechanical or hydraulic agitation.
2. Add the required amount of pesticide.
3. Add the required amount of MULTI-SPRED and continue agitation until a uniform mixture is obtained.

NOTE: Maintain constant agitation of spray mixture during standing and application to assure uniform pesticide application.

4. Add the remaining volume of water and mix contents thoroughly.

COMPATIBILITY

This product may be used with wettable powder, emulsifiable concentrate or solution formulations of most of the pesticides and insecticides now on the market.

Limitations, Restrictions, and Exceptions

DILUTE RATES:

Aerial Application: Use 4 to 16 pints of MULTI-SPRED per 100 gallons of spray solution in combination with the recommended pesticide.
