

RECOMMENDATIONS

General Information

DIRECTIONS FOR USE PRO

BUPHER is a citric acid based acidifier / buffering agent specifically formulated for lowering the pH of spray solutions where phosphoric acid or other strong acids is undesirable. PRO BUPHER may be used on agricultural, forestry, turf and ornamental, industrial, structural and non-cropland sites. NOT FOR AQUATIC USE IN WASHINGTON.

Read and follow the precautions, restrictions and recommendations on the labels of pesticides used with PRO BUPHER. Use according to the most restrictive label directions for each product in any tank mix.

COMPATIBILITY: PRO BUPHER is compatible with most pesticides. However, if the desired combination has not been previously used, a compatibility test is recommended.

Limitations, Restrictions, and Exceptions

RECOMMENDATIONS: A range of 4 ounces to 4 quarts of PRO BUPHER per 100 gallons of finished spray solution may be required depending on the desired final pH. Specific use rates will vary due to water quality variability (pH, alkalinity, hardness, etc.). In general, well water typically requires more product due to naturally occurring mineral content, whereas surface waters require less. For precise pH adjustments, test the spray solution with a pH meter or indicator strips.
