

GROWING CROPS (OUTDOORS AND IN GREENHOUSES) - CITRUS FRUITS

General Information

USED ALONE: This concentrate can be used also as a clean-up or a pre-harvest spray where other materials cannot be used because of residue restrictions. Contains natural pyrethrins.

Do not apply the product through any type of irrigation system.

USED AS A TANK MIX WITH OTHER INSECTICIDES: The product may be combined with other insecticides and acaricides where resistance may be a problem and to provide flushing of insects from hiding and into contact with other spray residues. This application should conform to accepted use precautions and directions for both products.

This concentrate is relatively non-toxic to honey bees. To avoid possible harm to honey bees, it is advisable to apply in the early morning or late evening hours.

Limitations, Restrictions, and Exceptions

Apply 2 to 16 ounces per acre and repeat if required to maintain effective control. Use in sufficient water for thorough coverage of upper and lower leaf surfaces (maximum of 100 gallons of water per acre) unless otherwise noted. It is recommended that the final spray mix be buffered to a pH of 5.5-7.0.
