

FOR USE ON LIVESTOCK - POULTRY LICE

General Information

USED ALONE: This concentrate can be used also as a clean-up or a pre-harvest spray where other materials cannot be used because of residue restrictions.

Contains natural pyrethrins.

Do not apply the product through any type of irrigation system.

USED AS A TANK MIX WITH OTHER INSECTICIDES: The product may be combined with other insecticides and acaricides where resistance may be a problem and to provide flushing of insects from hiding and into contact with other spray residues. This application should conform to accepted use precautions and directions for both products.

This concentrate is relatively non-toxic to honey bees. To avoid possible harm to honey bees, it is advisable to apply in the early morning or late evening hours.

Limitations, Restrictions, and Exceptions

LIVESTOCK

To control poultry lice, using a dilution of 2 to 3 ounces of concentrate per gallon of water spray roosts, walls and nests or cages thoroughly. This should be followed by spraying over the birds with a fine mist.
