

FOR USE ON LIVESTOCK - SHEEP “TICK” OR KED

General Information

USED ALONE: This concentrate can be used also as a clean-up or a pre-harvest spray where other materials cannot be used because of residue restrictions.

Contains natural pyrethrins.

Do not apply the product through any type of irrigation system.

USED AS A TANK MIX WITH OTHER INSECTICIDES: The product may be combined with other insecticides and acaricides where resistance may be a problem and to provide flushing of insects from hiding and into contact with other spray residues. This application should conform to accepted use precautions and directions for both products.

This concentrate is relatively non-toxic to honey bees. To avoid possible harm to honey bees, it is advisable to apply in the early morning or late evening hours.

Limitations, Restrictions, and Exceptions

LIVESTOCK

Dilute at the rate of 1 to 2 fluid ounces per 4 gallons of water and thoroughly wet all portions of the body by dipping or by spraying with sufficient pressure and with a nozzle adjustment to give penetration of the wool. Treat at a rate sufficient to wet the animal.
