

SWEET CORN (PREEMERGENT)

General Information

Refer in the label for the Corn Insecticide Applicator Settings.

Limitations, Restrictions, and Exceptions

Method of Application

Pounce may be applied as a preplant incorporated, pre-emergence, or at planting time application. Apply as a broadcast application by ground or air or 4-15 inch band.

Linear row calculations should be used proportional to the standard Band Width/Row Width formula to adjust rates for different band widths or row spacings. Use higher rates of Pounce 1.5 G when incorporating into the soil without exceeding the recommended dosage.
