

CITRUS AND AVOCADOS

General Information

General Information:

pHertigation 0-30-0 is a specially formulated phosphate nutrient for soil application. The phosphorus source in pHertigation 0-30-0 is white phosphoric acid, which is readily available orthophosphate. pHertigation 0-30-0 is designed to provide maximum availability of phosphorus which influence plant growth and crop quality when applied according to label directions. Nutrients and growth factors associated with phosphorus are increased root development, increased stalk and stem strength, and improved flower formation and seed production. pHertigation 0-30-0 is a supplement to an adequate and balanced soil and foliar fertility program. Monitor crop nutrient needs and responses with a soil and leaf tissue analysis program.

Directions for Use:

pHertigation 0-30-0 can be applied alone or mixed with other compatible fertilizers through fertigation or with conventional soil application methods. When applying this material via a fertigation system, continue to operate the system 30-60 minutes after material has completely injected to flush clean water through the system. pHertigation 0-30-0 can be blended with water to insure adequate coverage and uniform application.

Limitations, Restrictions, and Exceptions

Citrus and Avocados

Soil: Apply a minimum of 3 gallons per acre per application beginning at fruit set for a maximum of 15 gallons per acre. Repeat applications may be made in 21-28 day intervals.
