

# FIELD CROPS AND ROW CROPS

## General Information

### GENERAL INFORMATION:

Row Root SD is intended for use as a side dress, and is typically applied in combination with a bulk NPK fertilizer. It is intended for use as a soil applied material although it may be water run if needed. This product is intended to be a supplement to a fertility program. Always monitor crop nutrient needs and responses with a soil, leaf tissue and irrigation water analysis program.

### DIRECTIONS FOR USE:

Soil apply via mechanical application through direct spray or injection to the soil. Mix with sufficient water for adequate mixing and coverage of target areas. May be blended with compatible bulk NPK fertilizers. If applied with other materials, consult your Source to Source representative before applying in contact with the seed.

### Limitations, Restrictions, and Exceptions

### FIELD CROPS & ROW CROPS

Throughout the growing season, blend 1-2 gallons per acre with your compatible bulk NPK fertilizer, along with sufficient water for thorough coverage. Apply 1-4 times per growing season. If applied with other materials, consult your Source to Source representative before applying in contact with the seed.
