

FIELD CORN, SWEET CORN, MILO AND SORGHUMS

General Information

GENERAL INFORMATION

Corn King is a preplant or side dress fertilizer for field corn, sweet corn, milo and/or sorghums. This material contains 1.12 lbs of Nitrogen as Urea, and 0.28 lbs of P₂O₅ as Orthophosphoric Acid in each gallon. This product is for use in soil applications. It is intended to be a supplement to a fertility program. Always monitor crop nutrient needs and responses with a soil, leaf tissue and irrigation water analysis program.

DIRECTIONS FOR USE

Corn King is not intended for foliar applications.

SOIL APPLICATIONS:

Soil apply via mechanical application through direct spray or injection to the soil (soil injection or side dress). Mix in clean tank with sufficient water for adequate mixing and coverage of target areas. It is not recommended in applications where material will come into direct contact with seeds or young roots in its concentrated form.

PRECAUTIONS:

- Agitate prior to use.
- This product is not recommended for applications during bloom periods, or within 30 days of harvest or at any time when added nitrogen will adversely affect crop quality or marketability.
- Avoid or reduce applications on Nitrogen sensitive varieties.

Limitations, Restrictions, and Exceptions

FIELD CORN, SWEET CORN, MILO AND SORGHUMS

Apply at preplant and/or sidedress.
