

HERBICIDES

General Information

GENERAL INFORMATION

MSO ULTRA is an active premium blend of methylated seed oil and non-ionic surfactants. It provides superior spreading, penetration and activation of herbicides, as well as with other pesticides and/or fertilizers . MSO ULTRA is designed for use with agricultural chemical spray programs to optimize product performance by increasing leaf penetration while giving a more uniform distribution of the active materials.

Limitations, Restrictions, and Exceptions

HERBICIDES

Use 1 to 4 pints of MSO ULTRA per acre in combination with the recommended herbicide. NOTE: The above use recommendations are considered to be adequate for most uses. Some pesticides, however, may require higher rates for optimum effect. Follow the pesticide label directions when this occurs. However, do not add this product at a rate that exceeds 5% of the finished spray volume.
