

AIR OR GROUND

General Information

DIRECTIONS FOR USE

NO FOAM ADJUVANT may be used to increase the efficiency of acaracides, defoliants, desiccants, fungicides, herbicides and insecticides. This product insures quick wetting and uniform coverage that is beneficial to the performance of translocated and systemic chemicals. It may be used on agricultural, forestry, turf and ornamental, industrial, structural and non-cropland sites.

NO FOAM ADJUVANT is formulated from raw materials which will not tend to burn foliage or leave harmful residues. There will be no excessive foaming when high pressures are used.

Read and follow the precautions, restrictions and recommendations on the labels of pesticides used with NO FOAM ADJUVANT. Use according to the most restrictive label directions for each product in any tank mix.

RECOMMENDATIONS:

Specific use rates will vary with conditions of application such as water hardness, application method, equipment, spray droplet size, condition of foliage, etc. Also, higher rates than those below may be used if recommended by pesticide labeling. Follow pesticide label directions. However, do not add this product at a rate which exceeds 5% of the finished spray volume.

Limitations, Restrictions, and Exceptions

AIR OR GROUND

For improved efficacy, use at least $\frac{1}{2}$ pint per acre when finished spray volume is less than 20 gallons per acre. For backpack or hand held sprayers, use 1 fl. oz. per gallon of finished spray solution.
