

FRUIT TREES (APPLES) - APHIDS, APPLE RED BUG, ETC.

General Information

USE PRECAUTIONS

Do not spray plants suffering from drought (moisture stress). Do not apply during periods of prolonged high temperature combined with high relative humidity. Do not use this insecticide with dimethoate, herbicide or fungicides such as Captan, Folpet, Dyrene, Karathene, Morestan or any product combining sulfur. Do not use with Sevin 50W formulation (carbaryl) on deciduous fruit trees. Keep spray equipment used for those other products separate from the equipment used for the insecticide or make sure the sprayer is thoroughly cleaned so that no residue from those other products remain. Do not apply this product in a way that will contact any person or pet, either directly or through drift. Keep people and pets out of the area during application

APPLICATION INSTRUCTIONS

- The best times to spray are early evening and early morning.
- Completely cover the target pest and plant with spray solution.
- Do not exceed the maximum rates or apply more than specified.
- Certain plants may be sensitive to oil. A small number of plants should be test sprayed prior to general spraying.
- May be used up to day of harvest.
- Refer to the label for additional information regarding application to each ornamental species.
