

CUCURBITS, LEAFY VEGETABLES AND OTHER SPECIALTY CROPS

General Information

APPLICATION DIRECTIONS:

CIDETRAK D applications are bait treatments that require large discrete droplets rather than a full cover spray: A volume mean diameter (VMD) droplet size of 600 µm is recommended. See technical brochure information about how best to achieve this by air and by ground. All screens should be removed from the spray systems, including nozzle and strainer screens, or use screens larger than 6 mesh.

Limitations, Restrictions, and Exceptions

CUCURBITS LEAFY VEGETABLES AND OTHER SPECIALTY CROPS

BAIT: Mix CIDETRAK D with a standard bait using a suitable mixer. Apply according to directions for bait application.

NOTE: Do not mix with any additional adjuvants. Do not apply CIDETRAK D during rain or when rain is expected within 24 hrs of application.
